

Imaging Receptor Covers

STOP putting patients at risk. Avoid cross-contamination by utilizing disposable covers that are designed for Radiology Imaging Receptors. Pillowcases and trashbags are NOT leakproof, are a potential for artifacts, and can be a source for the spread of infection. Our covers are available in several sizes to meet your needs. Perfect for ER, OR, CCU, ICU, Mobile Imaging, or anywhere there is a risk for transmitting infection. Keep your receptors clean, patients safe and protect your Investment!
